Definitions

1. Historical Conditions

This section presents chronic conditions that have been reported for this patient one or more times in the previous two calendar years. All conditions listed have not yet been reported and require provider review to determine appropriateness in the current calendar year.

2. CMS Reported Conditions

This section presents condition categories that CMS has indicated are applicable to the member. Conditions listed in this section were reported to CMS by another payer, and therefore Prominence Health Plan does not have access to ICD-10 level diagnoses for these conditions. Information presented in this section is intended to be additive to what is contained in the Historical Conditions section.

3. Suspected Conditions

This section presents suspected conditions based on clinical algorithms. Conditions in this section have not been reported historically for the member and require provider review to determine appropriateness for the patient based on clinical judgement.

4. Recommended Screenings

This section lists recommended health screenings for this patient. Each screening takes into account patient specific variables such as age, gender, health conditions, and other relevant risk factors.

5. Quality Measures

This section lists quality measures for which this patient is eligible and not currently compliant. The measures criteria and eligibility is defined by NCQA. Compliance is determined by applying HEDIS specifications to available claims, labs, pharmacy and supplemental data sources.

Attestation

I attest that the responses entered on this form are accurate to the best of my knowledge in accordance with the Prominence Health Plan Care Form Policy Version I. I acknowledge that the information provided by Prominence Health Plan on this form is not intended to treat or diagnose the patient. Appropriateness of diagnosis and medical necessity is ultimately determined by the attending physician. All confirmed conditions, results and responses provided to Prominence on this form must be supported with proper documentation in the practice's medical record. All responses will be verified for accuracy by a certified coding/HEDIS specialist.
